January 2020

## Another Safe and Successful Year

Welcome back to all, I hope that you have had a wonderful break

And had an amazing holiday with your friends and family. Firstly, I would like to thank the staff that worked during the festive period.

Let's prepare for this New Year with positivity and ambition to reach higher limits and achievements not only in the work but also personal.

Let new beginnings signify new chapter filled with pages of success and happiness, written by the ink of hard work and intelligence.

Along with all the new hopes and promises that the New Year would bring hope. It also brings us a lot more opportunities to work together and put in 100% with everything that we do.

Our holiday is over, and we are back to work. We need to be 100% focused on what we are about to do.

We know the rules. We know the procedures. We have the skills and knowledge to work safely. We know what the correct tools are for a job. But, let's face it; there are times when our head just is not in the game. And losing focus is not a good thing.

We all need to know when this is happening and then **Reset, Refocus, and Act.**

That's what "4 Seconds to Safety" is all about. It's recognizing that we can lose our focus, acknowledging it when it happens, and then doing something about it. When we catch ourselves with our head not in the game, we need to stop and take 4 Seconds to Safety. In those 4 seconds clear your head, refocus, check your surroundings, and review the job. Ask yourselves the following questions....

- Am I putting myself or others at risk?
- Am I prepared to continue to work safely?
- Am I focused on what needs to get done?
- Am I ready to act to do it safely?

Only proceed after you know with certainty that the job will get done safely.

## Staff Birthdays

Stanley Rikhotso - 15<sup>th</sup> January
