## Vehicle maintenance

Maintaining a company vehicle, whether it is a car or machinery, is important for safety and ensuring that you take pride in your things.

You have invested thousands of Rands in your vehicle, so you need to be sure to maintain your vehicle properly. This is not the only reason to take regular vehicle maintenance seriously. There are several other factors that need to be considered.

**Extend the Life of Your Vehicle:** Just by following the regular maintenance schedule, you can keep several vehicle problems at bay. When you are traveling in your vehicle, the last thing you want is a car breakdown. Keeping up with the regular maintenance schedule can help by preventing costly repairs.

**Increased Safety:** A car breakdown at night on a quiet road can be a dangerous situation. You can never predict what may happen when you are stranded on a quiet road.

**Reduced Repair Costs:** Regular maintenance doesn't cost much but unexpected repairs and replacements can be expensive. Engine and other components don't fail without a reason. When you neglect maintenance, it gives way to minor problems developing that can become major with continued neglect of vehicle maintenance.

### Here are some of the routine inspections that are part of vehicle maintenance:

**Fluids:** Systems in your vehicle use fluids for functioning. Since they are enclosed in tight chambers, there is no risk of evaporation. However, over time, their levels deplete and the level of protection they offer against friction decreases. If you neglect vehicle maintenance, there will more wear and tear of the engine and other components, and ultimately you will be required to replace them.

**Tires:** The right air pressure and proper rotation ensures equal wearing of your tires. Maintaining the correct air pressure is the easiest thing to do and you can get it done at a petrol station when refueling. It doesn't take much time but it goes long way in increasing gas mileage and reducing wear and tear.

**Oil Change:** It is one of the most important aspects of vehicle maintenance that you should keep your eye on. Auto experts suggest vehicle owners change their oil after every 6 months. It is essential to maintain your engine in good condition.

## Staff Birthdays

Margaret Ndlozi - 07<sup>th</sup> August  
Cobus Wiese - 21<sup>st</sup> August

## SKILLS DEVELOPMENT

**Wisdom** is not a product of schooling but of the lifelong attempt to acquire it.

## Employee of the month

Congratulations and Thank You to **Mr. Adam Lifa and Mr. Jabili Faruku** on being selected for the employee of the Month for August.

On behalf of the entire RTC Control Systems (PTY) Ltd team thank you both for your excellent work ethic, professional attitude and all-around dedication to what you do. We couldn't do it without team members like you!

"Our goal is to always be the best and we are confident that with your work and participation we will achieve that goal." – "The greatness of our company is based on the quality of workers like you and the effort they make every day to provide the best service."

Everyone in this company could be employee of the month, the trick to doing all well at work is to get passionate about it and convey confidence on what you are doing. Take challenges which come your way and never say no to try. The success you got is the result of your hard work, keep it up for the future. Help each other to reach the destination, you desire.

Appreciate your job and love your family, and everything will go well for you.

## Other services we offer

### WHAT IS POWER FACTOR CORRECTION?

Power Factor is the ratio of true power used (kW) to the apparent power (kVA) used in an electrical circuit.

Essentially what this means is that Power factor is the measure of how efficient electrical power is consumed.

#### 3 Reasons to improve Power Factor

- 1) Reduce Electricity Bill
- 2) Increase System Capacity
- 3) Improve System Operating Characteristics

If you are interested in the benefits of Power Factor Correction for your business, then contact us today to setup an appointment to see how we can save you money on your monthly energy bill.
