RTC CONTROL SYSTEMS (PTY) LTD

February 2021

2021... Lets get back into it!

Welcome back to all, I hope that you have had a wonderful break And had a safe holiday with your family. Firstly, I would like to thank the staff that worked during the festive period.

Let's prepare for this New Year with positivity and ambition to reach higher limits and achievements not only in the work but also personal.

Let new beginnings signify new chapter filled with pages of success and happiness, written by the ink of hard work and intelligence.

This year will bring new challenges and probably will not be any easier than last year, but if there is anything that 2020 taught us is that everything can change in an instant. Things and people, you relied on can be taken away and what is tremendously important are the people you care about, that they are safe and that you are healthy and have a job and a roof over your head. We all need to take the time to enjoy the moments we have and do not take any day, anything, or anyone for granted.

Another point to always remember is:

Its unwise to pay too much, but its worse to pay too little. When you pay too much, you lose a little money that's all.

When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing it was bought to do.

The common law of business balance prohibits paying a little and getting a lot – its cant be done. If you deal with the lowest bidder, it is well to add something for the risk you run, and if you do that you will have enough to pay for something better.

Staff Birthdays

Thabang David Kortjas - 10th February
Brian Robert Boden - 12th February

SKILLS DEVELOPMENT

Mr. K. S. Fernandez starts his Module 0-3 training and N2 studies.

Mr. B. R. Boden starts his N3 studies towards his GCC.

Mr. T. R. Pretorius starts his N4 studies towards his GCC.

We have drawn up our plan, to try and give all staff some form of training and shall hopefully be able to execute it. If any other staff would like me to book training for them, please contact me and we can arrange for the training.

Employee of the month

Congratulations and Thank You to **Mr. Fassi Molungwane** on being selected for the employee of the Month for January.

On behalf of the entire RTC Control Systems (PTY) Ltd team thank you both for your excellent work ethic, professional attitude and all-around dedication to what you do. We couldn't do it without team members like you!

"Our goal is to always be the best and we are confident that with your work and participation we will achieve that goal." – "The greatness of our company is based on the quality of workers like you and the effort they make every day to provide the best service."

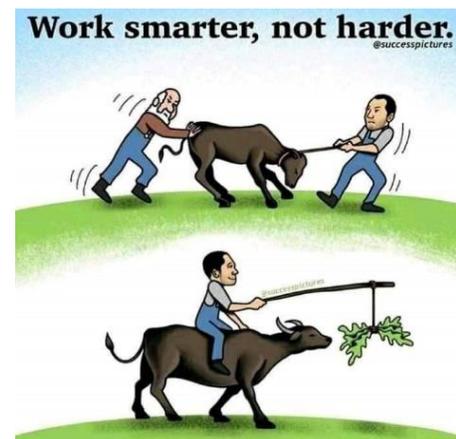

Everyone in this company could be employee of the month, the trick to doing all well at work is to get passionate about it and convey confidence on what you are doing. Take challenges which come your way and never say no to try. The success you got is the result of your hard work, keep it up for the future. Help each other to reach the destination, you desire.

Appreciate your job and love your family, and everything will go well for you.

SALES TARGET WINNER

Congratulations and Thank You to **Mrs. Stacy-Lee Pretorius** on reaching your sales target for the month of January.

You have set your target, you consistently keep on working hard to achieve the target, today your hard work paid up. Congratulations on achieving what you have set, and may you reach much higher targets in the future and that too you achieve.

It is never too early to start saving: the first step and cheapest way to efficiency is to STOP WASTING.

Preventative Maintenance Survey

We are a solution-oriented company focused on machine health and reliability through the application of the following technologies:

Vibration Meter Survey

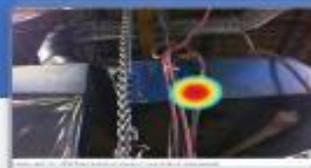

We use the most reliable vibration screening device available for frontline mechanical troubleshooting teams that need repeatable, severity-scaled readings of overall vibration and bearing condition.

Sonic Industrial Survey

Finally, a better way, quick, simple compressed air, gas and vacuum leak identification.

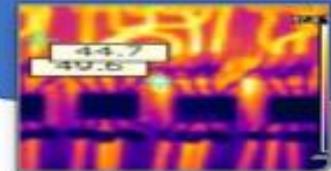

Do more with the same air compressors – delay the capital expense of installing an additional compressor.

Infrared Survey

Infrared thermography is an effective tool to help avoid electrical breakdown claims.

Testing equipment for electrical “hot spots” may pinpoint potential problems while there is still time to take preventive action

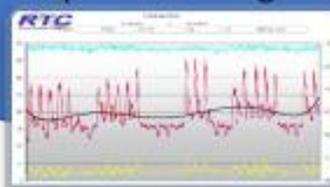

Sound level Survey

This survey is used to establish whether employees are being exposed to occupational noise levels exceeding the exposure limits set by the regulations

Monthly tariffs / Meter Reading Survey

This survey assesses and measures the energy consumption of each portion of the process. Identifies possible energy management opportunities on the site with financial considerations and or potential savings.

Illumination (Lux) Survey

Reports include a comprehensive analysis and mapping of the areas surveyed. Reports indicate and highlight areas that require additional lighting, which are non-compliant to industry regulations.

Stop letting your money fly out the door and give us a call today.
